

## SUMMARY

I am a developer To Work in a Challenging any, that provides scope for learning, creativity and exposure to new concepts for personal and professional growth. Having Strong integration problem solving skills

## EDUCATION

### Master of Computer Application

Master in SCET(Sarvajani College of Engineering and Technology) 2022-2024 semester 4 (8.00/10)

### Bachelor of Computer Application

Bachelor's Degree in C.B.Patel Computer College 2019 – 2022 (7.28/10)

### Software Developer Trainee – [PI CODE] Dec 2025 – Present

- ASP.NET Core MVC, C#, SQL Server)
- Working on real-time auction web application
- Identity, authentication & database handling

## SKILLS

- Asp.Net C#
- SQL Server
- ASP.NET Core MVC
- MVC Architecture
- SMTP Email
- Git

## CERTIFICATIONS

- Soft Skills
- AI Art Battle

## LANGUAGES

- English
- Hindi
- Gujarati

## INTERESTS

- Travel
- Music
- Reading Books

## PROJECT

### LiveAuctionSystem – Event-Based Online Auction Platform

LiveAuctionSystem is a real-time, event-based online auction web application developed using ASP.NET Core MVC and Entity Framework Core.

The system supports role-based access (Admin & User) and enables admins to create and manage auction events, while users can participate in auctions securely.

The application includes authentication, authorization, background scheduling, and database-driven auction logic, making it suitable for real-world auction workflows such as sports auctions (e.g., Cricket/IPL).

### Blood Community

Online Blood Donation System manage and track near donor or blood bank base on required blood group. In this system we have also manage Seekers details, Manage Blood Donor and donor record, Find Nearest one base on required blood group, Manage Search history, Manage Blood bank stock, Manage Hospital Blood History, Manage Seeker or Hospital Request, Reports. Duration: 2-3 month Role: Database and manage Hospital Blood Module Team Size: 3
